A 25-year-old man presented with swelling of ankle and face and multiple symmetrical large joint pain for 2 months. He also mentioned about rash in his face involving the cheeks and forehead which aggravated on exposure to sun (Fig A). He also had follicular lesion in the palm and sole and oral ulcer at the hard palate. (Fig B). Fundal photograph is also available. (Fig C)

**Q 1. What is the most likely diagnosis?**

**Q 2. What is atypical in this case?**

**Q 3. What is the finding in fundal photograph?**
