BJOG yearly CME program

Name of the Article:

Review article: Dengue in Pregnancy

Page no (36)

- **Q.1** Write T or F regarding the statement mentioned below according to the review article.
- a) Prevalence of Dengue in Bangladesh in 2000 was 5551
- b) Worst outbreak occurred in 2002 and was 5500
- c) From 2010 the incidence started to increase
- d) In 2019, it increases 50,000
- e) Highest serotypes of Dengue was DENV-3

Name of the Article:

Clinical Outcomes of Total Laparoscopic Hysterectomy (TLH): Seven Years' Experience in a Public Hospital.

Page no (28)

Q.2 Which of the following statements are T?

- a. In Shaheed Suhrawardi Medical College Hospital TLH due to benign disease done in 80% cases.
- b. In their series maximum size of the uterus was 36 week.
- c. Mean operating time was 130 minutes.
- d. Length of hospital stay was 2 days.
- e. Most common urinary complication was uretero vaginal fistula 3(1%)

Name of the Article:

"Histopathological findings of 100 cases of Abnormal Uterine Bleeding and their correlation with FIGO classification"

Page no (22)

Q.3 Which of the following statements are false according to above article?

- a. PALM-COEIN classification for causes of AUB was proposed by (FIGO) in 2015.
- b. According to this article prevalence of menorrhagia in DMCH was 60%.
- c. Commonest cause of AUB was AUB-O
- d. Commonest structural cause of AUB was AUB-L
- e. According to that article 40% AUB occur in adolescent and 60% in older than 45 years women.

Name of the Article:

Editorial: Abnormal Uterine Bleeding (AUB)
Page no (1)

- Q.4 Special tests for diagnosis of AUB are-
- a. Sonohysterography
- b. TVS
- c. Pap's Smear
- d. Hysteroscope
- e. Endometrial sampling for histopathology

Name of the Article:

"Immune thrombocytopenic purpura in pregnancy- a prospective observational study in a tertiary Care Centre"

Page no (15)

- Q.5 Write T or F about the statements on this article mentioned below.
- a. Total number of high risk patients from 2009-2017 at that department were 8000.
- b. Total number of ITP cases during that period were 50
- c. Frequency of ITP among high risk cases are 5/ 1000 live births
- d. 75% of the ITP cases were preexisting
- e. Caesarean section rate of ITP with pregnancy were 90%.
