

CHECKLIST OF MOSSES (BRYOPHYTA) OF GANGETIC PLAINS, INDIA

KRISHNA KUMAR RAWAT¹, AFROZ ALAM² AND PRAVEEN KUMAR VERMA³

CSIR-National Botanical Research Institute, Lucknow, India

Keywords: Bryophyta; Gangetic plains; Uttar Pradesh; Bihar; West Bengal

Abstract

An updated account of 79 taxa of mosses of Gangetic plains, representing 40 genera and 19 families, is provided. The family Pottiaceae with 17 taxa belonging to 9 genera appears most dominant and diversified family in the area while at generic level, the genus *Fissidens* (Fissidentaceae) with 19 species shows maximum diversity, followed by *Hyophila* and *Physcomitrium* each with five species.

Introduction

In our earlier publications, boundaries of ‘Central Indian bryo-geographical zone’ and ‘Panjab and Rajasthan plains bryo-geographic zone’ were proposed along with a checklist of mosses in these areas (Alam *et al.*, 2015; Rawat *et al.*, 2015). In present paper the boundaries of ‘Gangetic plains bryo-geographic zone’ is redefined for ease in distributional analysis, and provided updated checklist of mosses recorded from here.

Materials and Methods

The present compilation is based on the all available literature on mosses of Gangetic plains till date and gets its foundation from extra-ordinary work of Gangulee (1969-72; 1972-76; 1976-78), who has provided the most elaborative, informative and reliable data of moss diversity of India. In enumeration, the taxa reported earlier without specific epithet, have been excluded. The summary of various families and genera is followed by alphabetical list of taxa. The accepted names are cited in bold. Format of the enumeration of taxa follows Alam *et al.* (2015). The classification scheme broadly follows Goffinet *et al.* (2008). The extant of ‘Gangetic plains bryo-geographic zone’ described here is broadly based on Erenstein *et al.* (2007), with some modifications.

Results and Discussion

Earlier, entire Uttar Pradesh, Delhi, Bihar (including Jharkhand) and almost entire West Bengal (except Darjeeling) have been broadly treated as part of Gangetic Plains bryo-geographic zone. However, some parts of this region, due to somewhat different geo-physical properties and climatic conditions, shows more affinity to neighbouring zones, hence need re-assessment and refinement of boundaries of this unique bryo-geographical zone. The extant of ‘Gangetic Plains bryo-geographic zone’ described in present work is broadly followed Erenstein *et al.* (2007), however, some modifications are made on account of the unique geo-climatic conditions meet in the region. The southern region of Uttar Pradesh [particularly the Bundelkhand region (Jalaun,

³ Forest Research Institute, Dehra Dun, India.

Jhansi, Lalitpur, Hamirpur, Mahoba, Banda, Chitrakoot districts) and Sonbhadra district] is a plateau and hence shows contrasting difference from the alluvial plains in geo-physical properties, hence treated in Central Indian bryo-geographic zone. Similarly, Purulia district of west Bengal, consisting of easternmost segments of Chhota nagpur plateau is now treated under Central Indian bryo-geographical zone (Alam *et al.*, 2015). Entire Uttarakhand state, on the other hand is being treated in Western Himalayan zone, however, most of the part of Haridwar and Udhampur districts of Uttarakhand is either plain or terai (foot hills), hence need to be incorporated in Gangetic Plain region. Hilly areas of Darjeeling districts has been considered as part of Eastern Himalayan zone, however, Jalpaiguri and Koch Bihar district of West Bengal are proposed to be included in Brahmaputra plains which itself can be treated as a separate bryo-geographic zone, subject to further studies. Earlier reports of mosses from Gangetic Plains (from Delhi) have now been transferred to Rajasthan and Panjab plains zone (Rawat *et al.*, 2015).

Therefore, in present work we propose Haridwar and Udhampur district of Uttarakhand, Shahdara zone or East Delhi, Uttar Pradesh (except southern plateau region of Uttar Pradesh including Bundelkhand region and Sonbhadra district), Bihar and West Bengal (excluding Purulia, Koch Bihar, Jalpaiguri districts and plains of Darjeeling district) as parts of ‘Gangetic plains bryo-geographic’ zone (Fig. 1).

Fig. 1. Map of India showing the proposed extant of ‘Gangetic plains bryo-geographic zone’.

The present document provides updated accounts of 105 taxa of mosses reported so far from this zone, out of which 79 are still valid. Distributional details with relevant references are also given, which may be useful for future workers and will encourage bryo-floristic studies in neglected areas.

Semibarbula orientalis (F. Weber.) Wijk. & Margad, Taxon 8: 75. 1959. UTTAR PRADESH: Lucknow (Nath et al., 2010); Bengal plains (Gangulee, 1969-72).

Splachnobryum bengalense Gangulee, Mosses E India 4:865. 1974. WEST BENGAL: Konnagar (Gangulee, 1974-78; Lal, 2007).

Splachnobryum indicum Hampe & Müll. Hal. →*Splachnobryum obtusum* (Brid.) Müll. Hal.

Splachnobryum obtusum (Brid.) Müll. Hal., Verh. K.K. Zool.-Bot. Ges. Wien 19: 504. 1869.

Splachnobryum indicum Hampe & Müll. Hal., Linnaea 37: 174. 1972. UTTAR PRADESH: Allahabad (Gangulee, 1974-78; Lal, 2007; Singh 2013; all as *Splachnobryum indicum*), Lakhimpur-Kheri, Pilibhit (Sahu and Asthana, 2015); WEST BENGAL: Hoogli, Howrah, Kolkata (Gangulee, 1974-78; Lal, 2007; Singh 2013; all as *Splachnobryum indicum*).

Stereophyllum tavoyense (Hook. ex Harv.) A. Jaegr., Ber. Thätigk. St. Gallischen Naturwiss. Ges. 1877-78: 279. 1880. BIHAR: tropical plains (Gangulee, 1978-80; Lal, 2007)

Stereophyllum wightii (Mitt.) A. Jaegr., Ber. Thätigk. St. Gallischen Naturwiss. Ges. 1877-78: 279. 1880. WEST BENGAL: Bengal plains, 24-pargana, Maldah (Gangulee, 1978-80; Lal, 2007)

Syrrhopodon burmensis (Hamp.) Reese & Tan, Taxon 35(4): 693. 1986. *Calympere calcuttense* Bartr. & Gangulee, J. Bombay Nat. Hist. Soc. 60: 632. 1963. WEST BENGAL: Sonarpur near Kolkata (Gangulee 1969-72; type of *Calympere calcuttense*).

Taxithelium nepalense (Schwägr.) Broth., Monsunia 1: 51. 1899. WEST BENGAL: Kolkata, Howrah, Hoogli, Nadia (Gangulee, 1978-80; Lal, 2007).

Trachyphyllum inflexum (Harvey) Gepp. in Hiren, Cat. Weln. Afr. Pl. 2, 21: 299. 1901. UTTAR PRADESH: Pilibhit (Sahu and Asthana, 2015).

Trachypodopsis serrulata (P. Beauv.) Fleisch., Hedwigia 45: 67. 1906. WEST BENGAL: Kolkata (Chopra, 1975; Lal, 2007).

Trematodon capillifolius Müll. Hal. ex G. Roth., Aussereur. Laubm. 296: 28. 1911. UTTAR PRADESH: Unnao (Shuklaganj), Kanpur (Jajmau), Raebareli (Dalmau) (Sinha et al., 1990; Lal, 2007).

Urocladium calcutense Müll. Hal. →*Pinnatella alopecuroides* (Hook.) Fleisch. var. *culcutensis* (M. Fleisch.) Gangulee

Vesicularia montagnei (Schimp.) Broth., Nat. Pflanzenfam. 1(3): 1094. 1908. WEST BENGAL: Howrah, Kolkata (Gangulee, 1978-80; Lal, 2007).

Weissia controversa Hedw., Spec. Musc. Frond. 67, 1801. UTTAR PRADESH: Shahjahanpur (Sahu and Asthana, 2015).

Summary of Family wise representation of mosses of Gangetic plains:

Archidiaceae: *Archidium* (1)

Bartramiaceae: *Bartramidula* (1), *Philonotis* (3)

Bruchiaceae: *Trematodon* (1)

Bryaceae: *Brachymenium* (1), *Bryum* (3), *Gemmabryum* (1)

Calymperaceae: *Calymperes* (1), *Heliconema* (1), *Octoblepharum* (1), *Syrrhopodon* (1)

Dicranaceae: *Dicranella* (1)

Ditrichaceae: *Ceratodon* (2), *Garckea* (2)

Erpodiaceae: *Aulacopilum* (1), *Erpodium* (1)

Fabroniaceae: *Campylodontium* (1)

Fissidentaceae: *Fissidens* (19)

Funariaceae: *Entosthodon* (2), *Funaria* (1), *Physcomitrium* (5)

Hypnaceae: *Glossadelphus* (1), *Vesicularia* (1)

Meteoriaceae: *Diaphanodon* (2), *Trachypodopsis* (1),

Mniaceae: *Pohlia* (1)

Neckeraceae: *Pinnatella* (1)

Plasiadelphaceae: *Taxithelium* (1)

Pottiaceae: *Barbula* (2), *Didymodon* (1), *Gymnostomiella* (1), *Gymnostomum* (1) *Hydrogonium* (3), *Hyophila* (5), *Semibarbula* (1), *Splachnobryum* (2), *Weissia* (1)

Pterigynandraceae: *Trachyphyllum* (1)

Stereophyllaceae: *Entodontopsis* (1) *Stereophyllum* (2)

Doubtful records:

Barbula tenuirostris Brid., Bryol. Univ. 1: 826.1827. Lal (2005) listed it in Gangetic plains without locality, however, Aziz & Vohra (2008) did not reported its occurrence in Indian region.

Ganguleea angulosa (Broth. & Dix.) Zander, Phytologia 65: 427.1989. UTTAR PRADESH: Lucknow (Bansal et al., 2015; reported without specimen number and herbarium name, which makes the record dubious)

Excluded record:

Archidium birmanicum var. *pariharii* Lal, in Nath & Asthana, Current Trends in Bryology, 133, 2008. UTTAR PRADESH: Allahabad, (Lal, 1995, 2007; Singh 2013) nom. inval. (ICN art.39.1, no Latin diagnosis; art. 40.1, no Type; art. 40.7, no Herbarium specified)

Acknowledgements

The authors are thankful to Drs. A.K. Asthana and Vinay Sahu, Bryology laboratory, CSIR-National Botanical Research Institute, Lucknow for their kind help during the study. KKR wishes to acknowledge the financial support from GAP-3356 by Ministry of Water Resources, Govt. of India. One of the authors (AA) is also grateful to Professor Aditya Shastri, Vice Chancellor, Banasthali Vidyapith and Professor Vinay Sharma, Dean, Faculty of Science and Technology, Banasthali University, Rajasthan, India, for their kind support for this research work.
