Chattagram Maa-O-Shishu Hospital Medical College
Chattogram, Bangladesh.

Medical education today faces the dual challenge of maintaining scientific excellence while nurturing the humanistic values that define the noble profession of medicine. In an era marked by rapid technological advancement, evolving disease patterns, and increasing expectations from society, medical institutions must be guided by a clear mission and vision. These guiding principles shape not only academic priorities but also the character and professional identity of future physicians. At **Chattagram Maa O Shishu Hospital Medical College**, our mission and vision serve as the foundation upon which our educational, clinical and research endeavors are built.

The mission of our institution—“*To Develop Competent, Compassionate and Socially Responsible Doctors for Home and Abroad*”—reflects our commitment to producing physicians who are not only clinically skilled but also deeply empathetic and ethically grounded. Competence in medicine requires a strong foundation in biomedical sciences, clinical reasoning, and evidence-based practice. However, the practice of medicine extends beyond technical knowledge. Compassion and empathy are essential in fostering trust between physicians and patients and in ensuring that healthcare delivery remains patient-centered. Medical education must therefore cultivate both intellectual rigor and humane values, preparing graduates to address the complex health needs of individuals and communities alike.^{1,2}

Equally important is the emphasis on social responsibility. In a country like Bangladesh, where healthcare disparities remain a pressing concern, physicians must be sensitive to the social determinants of health and committed to serving diverse populations. Our mission encourages students to recognize medicine as both a profession and a social commitment. Through clinical training, community engagement and exposure to public health challenges, we aim to instill a sense of responsibility that extends beyond hospital walls, motivating future doctors to contribute meaningfully to national and global health systems.³

Complementing this mission is our vision “*To Lead in Innovation and Excellence in Medical Education and Healthcare.*” Excellence in medical education requires continuous adaptation to emerging scientific knowledge and evolving educational methodologies. Modern medical training increasingly emphasizes integrated curricula, simulation-based learning, and the use of digital technologies to enhance clinical competence. By fostering a culture of academic inquiry and encouraging research activities among faculty and students, our institution seeks to remain responsive to the dynamic landscape of healthcare education.⁴

Innovation also plays a vital role in improving healthcare delivery. Advances in diagnostics, therapeutics, and health information systems have transformed the practice of medicine worldwide. Medical institutions must therefore cultivate an

environment where new ideas are encouraged, and evidence-based solutions are pursued to address healthcare challenges. By integrating research, clinical service, and education, we aspire to contribute to innovations that enhance patient care and strengthen healthcare systems.

At Chattagram Maa O Shishu Hospital Medical College, the alignment of mission and vision guides our ongoing efforts to integrate education, service, and research. Faculty members remain dedicated to mentoring students, fostering professionalism, and promoting ethical medical practice. At the same time, students are encouraged to develop critical thinking compassion and a lifelong commitment to learning. Such an integrated approach ensures that graduates are prepared not only to meet the demands of modern medicine but also to serve humanity with integrity and dedication.,

As we look to the future, our mission and vision continue to inspire us to strive for excellence while remaining firmly rooted in the values of compassion and social responsibility. By nurturing capable and conscientious physicians, we hope to contribute to the advancement of healthcare both within Bangladesh and beyond. Ultimately, the true success of any medical institution lies in the impact its graduates make in the lives of patients and communities they serve.
