Sudden Unilateral Blindness in a Healthy Man

SUMAIYA SULTANA BINTE MOSHARRAFI, MAHMUDUR RAHMAN SIDDIQUI2, MD SHAHRIAR MAHBUB2

Clinical Presentation
A 40-year-old previously healthy man presented with sudden dimness of vision in his right eye without any pain or redness. Clinical examination revealed visual acuity 6/36 and normal anterior segment of right eye. But fundoscopic examination of right eye revealed (Fig 1,2). Left eye was normal.

Questions:
1. What are the findings in the pictorial?
2. What is the diagnosis?

Answer
See page 117 for answer.

Fig-1: Fundus photography of the right eye.

Fig-2: Fundus photography of the left eye.
